

ACKNOWLEDGMENTS

The work on which this study was based was undertaken while holding a Frank Chapman Memorial grant from the American Museum of Natural History. Dr. S. Dillon Ripley who is studying and reporting on the Forbes-Watson collections has kindly agreed to my describing *A. b. bensoni*. I am obliged to the Directors and Curators of the following institutions for facilities for study: in Africa—the National Museum, Bulawayo and the Transvaal Museum, Pretoria; in Europe—the Alexander Koenig Museum, Bonn and the Koninklijk Museum voor Midden-Afrika, Tervuren; in the United States of America—Louisiana State University Museum of Natural Sciences, Baton Rouge, Field Museum of Natural History, Chicago, Museum of Comparative Zoology of Harvard University, Cambridge, County Museum of Natural History, Los Angeles, American Museum of Natural History, New York, the Academy of Sciences, Philadelphia, U.S. National Museum, Washington, Peabody Museum of Natural History of Yale University, New Haven. Dr. Richard L. Zusi and Mr. Melvin A. Traylor kindly criticized drafts of this paper.

A new name for a race of the Black-headed Oriole

by Walter J. Lawson

In the *Durban Museum Novitates*, vol. vi, (16), p. 199, 1962, I described a new race of the Black-headed Oriole from the coastal lowlands of Moçambique as *Oriolus larvatus tibicen* Lawson, the type-locality being Panda, in the Inhambane district. Unfortunately I now find that this name is pre-occupied by *Oriolus Galbula tibicen* A. E. Brehm, *Verz. Samml.*, 1866, p. 4, nom. nud. lodged in the synonymy of *Oriolus oriolus oriolus* (Linnaeus), 1758, by Hartert, in *Vög. pal. Fauna*, vol. i, p. 51, 1903, from which it cannot be extracted and used again. I therefore propose

Oriolus larvatus additus nom. nov.,

for *O. l. tibicen* Lawson, 1962, not *O. G. tibicen* A. E. Brehm 1866 (Hartert, 1903).
